JILONG®

Pump Up Possibilities

Company Mission

During the past 20 Years more than..

1,000,000 Jilong Watercrafts

10,000,000 Jilong Pools

100,000,000 Jilong Air Beds

and **1,000,000,000** items of Jilong Fun Gear

... have been brought to gardens, houses, swimming pools, beaches, lakes and rivers in more than 50 countries around the globe, helping people to relax, to have fun - to simply have a Great Time!

Jilong - Pump up Possibilities.

Company Profile

Shanghai Jilong Plastic Products Co., Ltd. is an export orientated manufacturer of plastic leisure products with a considerable experience in R&D, high quality manufacturing and world-wide sales. Every year JILONG products reach customers in more than 50 countries in Europe, North America, Australia and Asia.

JILONG factory is equipped with its own R&D centre, where a highly professional team collaborates with foreign designers to develop new products and packages. Various technical parameters of each new product have been tested and verified by internal professional lab, such as ITS, TUV and SGS.

JILONG offers excellent quality, competitive price, OEM manufacturing, low minimum order quantities, timely delivery, product warranty and after sales service in Europe and North America. Join us in our effort to make life more fun!

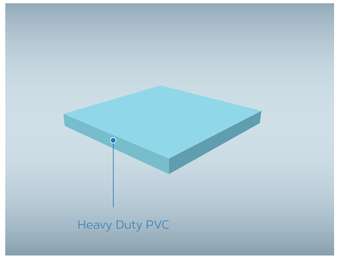
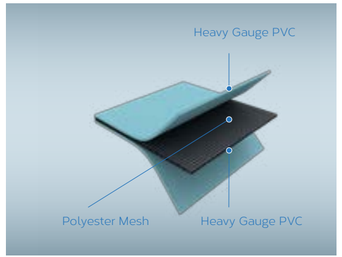
JILONG®
Pump Up Possibilities

Material and Technology

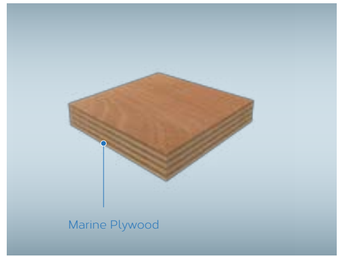
Our construction materials and technology that make our paddle boards, boats and kayaks durable and safe to use.



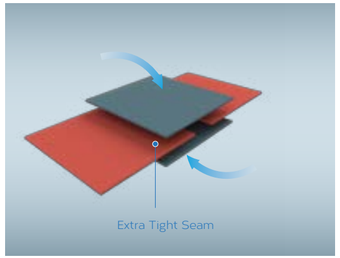
More economical: A single layer of heavy duty PVC is used to form a strong body for boats.



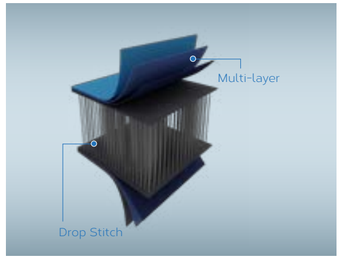
Safer: A 3-layer laminated material of a polyester mesh with a heavy gauge PVC at each side is used to form a strong and super durable wall for boats.



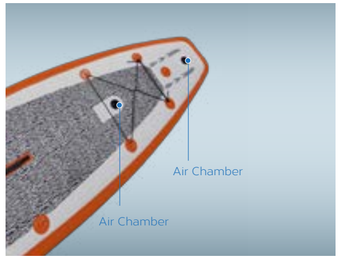
Anti-corrosion: First-grade marine plywood with PU coating offers extreme protection against sunlight, salt water, chemical, and fungal attack, much better than a standard plywood..



Anti-leakage: High frequency welding that creates an unbreakable and extra-tight seam for all inflatable boards, boats and kayaks.



More Solid: A multi-layer material using the"drop stitch"method of construction allows for much higher pressure inflation than a standard PVC material. Higher pressure inflation provides a more rigid floor that can enhance the performance of paddle boards and boats.



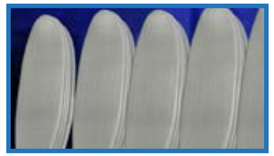
2 air chamber tech in SUP, Jilong has received a Patent, which can provides users a higher level of safety: even when one air chamber is not working, it can still take the user back to land.

Quality Assurance

Test 1:

Each board have been past strictly 96h tightness test before packing

First step:
semi-48h leak detection



Second step:
finished-48h leak detection

Test 2:

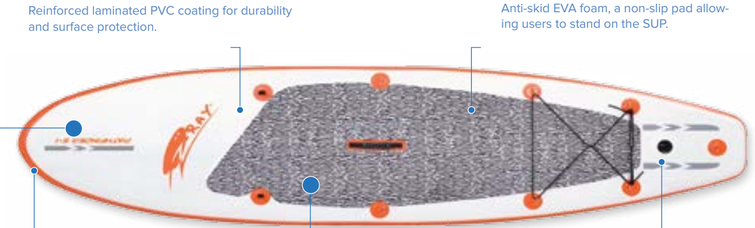
Material has past three years of weathering test

Test 3:

Each batch of material has past physical performance verification test

SUP-Technical Advantages

Double-layer lamination technology makes sure better quality and performance.



Reinforced laminated PVC coating for durability and surface protection.
Anti-skid EVA foam, a non-slip pad allowing users to stand on the SUP.
All around protective strake to increase product durability.
High-pressure screw valve to ensure for high air pressure in the double-wall inner tube.

High strength and good bearing capacity.
Conform to EN15649/ISO6185 standards for strength and buoyancy requirements.

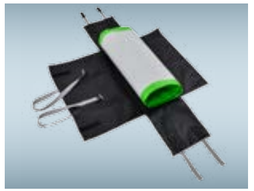
EASY-PACK

New Product

JL370374N
• 132x86cm

Step 1:

Step 2:



Step 3:

Step 4:

Step 5:

Easy! Fast! Firm!
Both hand-held and backpack features.
